Vista Orb Clock Free Download

Vista Orb Clock displays a clock and comes with several skins based on Windows Vista. You can set the names for the clock, time zone, and second hand and hide the second hand. Set the time and date by using the Settings button. The tool can be moved anywhere on the desktop and shown only when running in the foreground. In the previous time zone features included more options like Date, Timezone, Time Period, Day of Week, etc. The gadgets described in this section can help you carry out a variety of common tasks. For example, several simple apps can add a special touch to your desktop and improve its level of appeal. Previous releases of Soft32 had web gadgets as their main tools, but since users are given more and more possibilities to personalize their computers' appearance, a wide range of gadgets can now be found all over the Internet. These simple apps can add a special touch to any desktop and improve its level of appeal. Vista Orb Clock is one of these simple gadgets; it displays a clock and comes with several skins based on Windows Vista. The small tool can be customized from the "Options" area. Thus, you can write a name for the clock that is placed right in the middle of the skin, in white or black color (depending on the contrast level suggested by the skin of choice). Vista Orb Clock allows you to switch through 12 different skins, change the time zone and hide the second hand. Additionally, you can access the system's "Date and Time Properties" right from the "Options" section. Plus, you can move the tool anywhere on the desktop, set it to stay on top of other programs and specify the opacity level between 20% and 100%. Unfortunately, the gadget does not include a digital clock and does not display the current date and time. The app has not caused us any problems during testing; no error dialogs have popped up. Vista Orb Clock is certainly worth looking into if you plan to expand your gadget collection. Its limited features should be easily figured out, even by less experienced users. Hello, I have an issue with the planet skins. Downloaded the vista orb clock with the planet skins. It runs on all the skins except the planet skins. When I tried to run the clock on the planet skins, it displays a 'Busy' icon. When I went on the options, I can see the clock... but the clock does not show up. Hello, I have an issue with 09e8f5149f

Vista Orb Clock Download

With Vista Orb Clock, you can have a clock on your desktop. Features: Display time and date. Switch between skins. Rotate the time-aide clock by 90 degrees. Hide the second-hand wheel. Hide the text "Orb" from the clock. Set the opacity-level. Display the last 3 to 10 weather-conditions. Set the hour automatically. Export as a.skin file. Vista Orb Clock is a useful tool to be used as a clock or as a digital time-aide. It can be placed anywhere on your desktop and presents the current time and date. Additionally, you can change the skin-color, hide the clock's second hand and rotate the device by 90 degrees. Unfortunately, it is not the full package, but still it might be useful for some. The application does not include a digital clock, nor does it display weather information. Besides, we have not seen any errors pop up during our testing. However, since the application is not fully featured, the user might have a difficult time customizing it. Save time and give Windows a personal touch with these simple gadgets. Gizmob is one of these simple gadgets. The small tool allows you to recover accidentally removed programs by adding it to the system's "Recover" folder. Once installed, the app will remember the location of the folder every time the system boots. In case you have lost it, all you need is to open Gizmob from the "Run" menu and type the name of the folder into the search field. While you can erase this feature from the panel, you can also set it to make the gadget disappear from the desktop after 30 minutes. The extension uses "2 icons" to indicate that you have added an application to the "Recover" folder. No error messages have popped up during our tests; however, be prepared for some minor quirks. Gizmob Description: Gizmob helps you recover applications, which were accidentally removed from your Windows system. Features: Recovers your apps in the "Recover" folder. Add newly-installed programs to the folder automatically. Displays the icon-collection in an attractive way. Have the icon-collection saved in the registry. Remove-apps from the system by opening an "Open Command Prompt" window. Add new applications by entering the exact filename and path. Makes the "Recover" folder available

What's New in the?

A cool Vista Orbit Clock wallpaper Vista Orbit Clock: Compatible with Windows Vista SP1 With the Vista Orb Clock, you'll be able to display a digital clock on your desktop. Vista Orb Clock isn't just a static image with a clock placed on the screen; you can actually adjust the size of the time and make it read the current date and time. Moreover, you can also set the time zone, choose a color and place the app on the taskbar or on the desktop. It's also possible to hide the second hand. You can even set the opacity level between 20% and 100%. Vista Orb Clock isn't a battery-friendly tool, since it doesn't include a power management component. For this reason, it's advised to keep it in your system tray and make sure it's not taking up space that could be used by other small apps. In addition to providing the current date and time, Vista Orb Clock also displays an unlimited number of varying skins. You can even create your own wallpaper in this way. Furthermore, you can assign a name to the clock, so that you can easily find it on your desktop. Vista Orb Clock's icon is placed in the system tray, so you can easily access it. In order to obtain this free tool, you'll first need to go to the official Vista Orb Clock web page and click on the green download button that's present on the top-right corner of the page. Vista Orb Clock Screenshots: You can also do the following: Use Vista Orb Clock and change its look and feel; Personalize the clock appearance by naming it; Switch among available skins; Change the time zone; Adjust the opacity level between 20% and 100%; Hide the second hand; Move Vista Orb Clock anywhere on the screen; Locate Vista Orb Clock in the system tray. Vista Orb Clock Supported Formats: Portable and Movable objects Vista Orb Clock Review What's New in This Release: 1.0.1 -fixed some issues with the skins Find The Vista Orb Clock Download Link About The Author: Thanks for visiting our site. At this moment we have not listed the Vista Orb Clock review or you can say that we have not covered it. Most probably, the developers are working hard to finish the
